Art Unit: 1652

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- Claims 1-2, drawn to isolated DNA molecules encoding a kinase having SEQ ID
 NO:2, classified in class 536, subclass 23.2.
- II. Claim 3, drawn to isolated DNA molecules encoding a kinase having SEQ IDNO:4, classified in class 536, subclass 23.2.
- III. Claims 4-6, drawn to isolated DNA molecules encoding a kinase having SEQ IDNO:7, classified in class 536, subclass 23.2.
- IV. Claim 7, drawn to isolated DNA molecules encoding a kinase having SEQ IDNO:9, classified in class 536, subclass 23.2.

The inventions are distinct, each from the other because of the following reasons:

The inventions of Groups I-IV are patentably distinct each from the other becuase each invention is directed to an unrelated chemical structure and function.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently

Application/Control Number: 09/940,921

named inventors is no longer an inventor of at least one claim remaining in the application. Any

amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the

fee required under 37 CFR 1.17(i).
